BLANCO

Model Code

BIC64B

Description

60cm, 4 Zone (Dual MaxiZones) Induction Cooktop, Slide Control, Bevelled Edges

Warranty

BLANCOCare™ 2 years parts & labour

Features

Benefits

Dual MaxiZones

The MaxiZone technology allows the use of multiple pots of varying shapes and sizes at any one time, on the 38cm Dual MaxiZone.

AcuSense Technology

The cooktop also encompasses AcuSense technology which automatically recognises the size and shapes of pots as well as their position on the cooktop.

Four Powerful 3700W Zones

Four powerful individual zones featuring EGO G5 induction technology to ensure that every induction zone is utilised to its full extent, without cold spots.

14 Stage Temperature Settings

With 14 different settings including Boost, Super Boost, Melting 42°C, Keep Warm 70°C, and Boiling 94°C you can select the ideal cooking temperature for all types of foods to provide the perfect cooking results.

Additional Preset Functions [F]

With the touch of the 'F' key, the preset Melting 42°C, Keep Warm 70°C, and Boiling 94°C functions are activated. This allows perfect control at the relevant preset temperature. This can be set for all 4 zones independently.

Double Boost Technology

Convenient feature on all 4 zones where 'Boost' and 'Super Boost' can be selected to bring the zone to the maximum power level and will stay on maximum power for 10 minutes (unless deactivated) before dropping back to power level 9.

99 Minute Timer On All Zones

Each zone has its own 99 minute timer function - a convenient and easy way to program the cooking time on any cooking zone. When the timer ends a beep will sound to advise the cooking is finished and the zone will switch off.

Stop N Go Function

This function pauses the cooktop but maintains the current cooking level in its memory which can be resumed at any time. A convenient and unique function.

Specifications

Method Of Installation:	Bench top
Dimensions:	590W x 520D mm
Cut-out Size:	560W x 490D mm
Induction Zones:	4 zones including dual MaxiZones
Controls:	14 stage temperature settings including Boost, Super Boost, Melting, Keep Warm and Boiling
Power Requirement:	7400 W
Connection:	Single Phase 220/240V – 31 amp - hard wiring required Double Phase 280/415V -18 amp - hard wiring required
Overflow Cut Off:	Yes
Auto Heat Up:	Yes
Residual Heat Indicators:	Yes
Recall Function:	Yes
Safety Lock:	Yes
Timers:	Yes 99 minute timers
